## Water Meter Portal — Resident Guide

### What this guide covers

- Signing in with an email code — no password needed
- Reading your water dashboard
- Checking your bill and daily history
- Understanding your meters
- Setting a password later (optional)

Regency Anantam · Rosalyn-21

Your flat number and usage will appear in place of the samples shown here.

## 1. Signing in with an email code

Open the portal link given by your society office in any browser on your phone or computer.

**No password is needed the first time.** Choose the **Email code** tab and we send a code to the email registered for your flat.

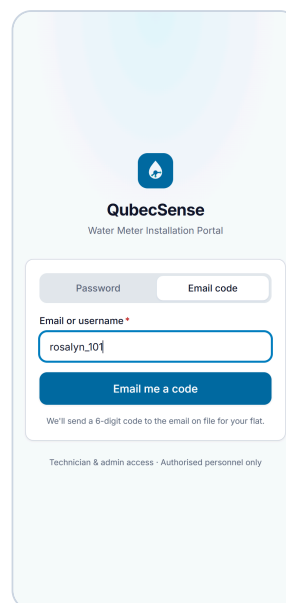

1. Tap the **Email code** tab.
2. Type your **username** or your **flat's email address**.
3. Tap **Email me a code**.

### Your username

The word **rosalyn**, an underscore, then your flat number:

| Flat | Username     |
|------|--------------|
| 101  | rosalyn_101  |
| 1203 | rosalyn_1203 |

You can also just type the email address the society has on file for your flat — either works.

Choose "Email code" to sign in

## 2. Entering your code

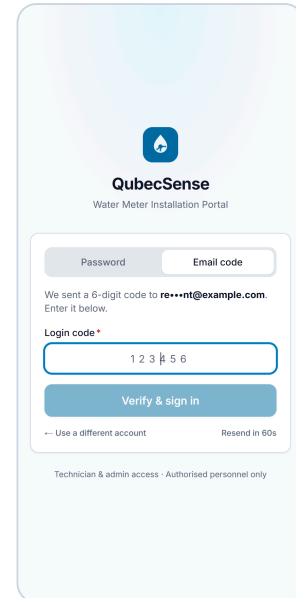

Within a few moments you will receive an email from QubecSense with a **6-digit code**. Open your email, then:

1. Type the 6-digit code into the box.
2. Tap **Verify & sign in**.

That's it — you go straight to your dashboard.

**Didn't get it?** Check your spam/junk folder. After a minute you can tap **Resend code**.

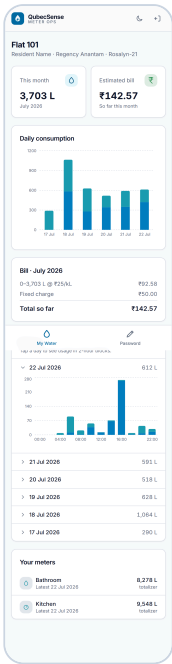

Each code works only **once** and expires after **10 minutes**. Never share it with anyone.

The image shows a mobile app interface for 'QubecSense Water Meter Installation Portal'. At the top is a blue header with a water drop icon and the text 'QubecSense Water Meter Installation Portal'. Below this is a login section with two tabs: 'Password' and 'Email code'. The 'Email code' tab is selected. A message states: 'We sent a 6-digit code to re\*\*\*\*nt@example.com. Enter it below.' Below this is a 'Login code' label and a text input field containing the digits '1 2 3 4 5 6'. A blue button labeled 'Verify & sign in' is positioned below the input field. At the bottom of the login section, there are two links: 'Use a different account' and 'Resend in 60s'. A small footer note at the very bottom reads 'Technician & admin access - Authorised personnel only'.

Enter the 6-digit code from your email

### 3. Your dashboard at a glance

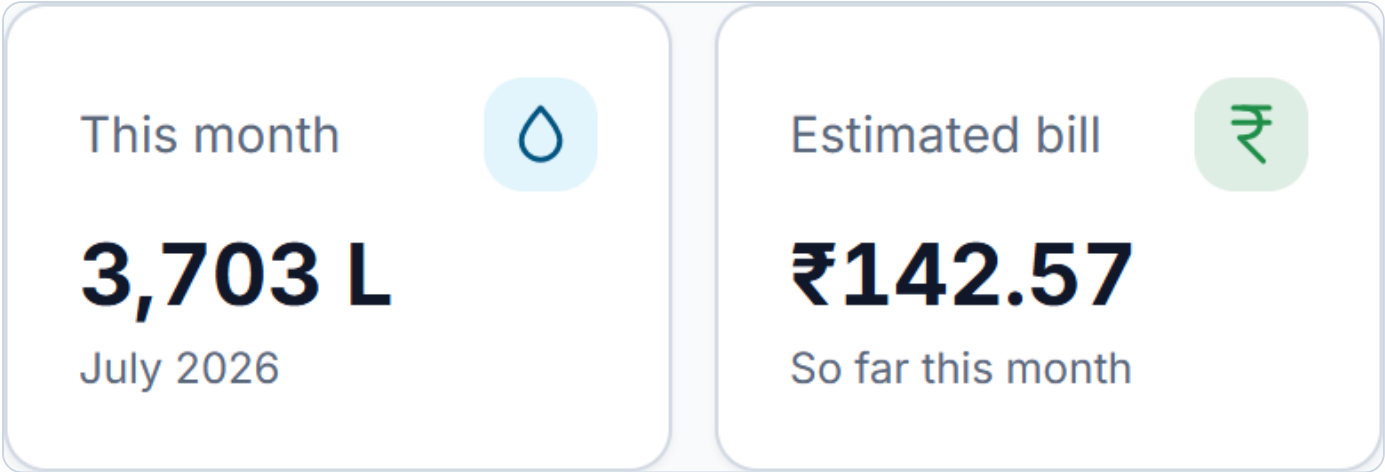

After signing in you land on **My Water** — everything about your flat's water use, in one screen.

The complete resident dashboard

The sections are explained one by one on the following pages.

## 4. This month and your bill

Summary cards at the top of the dashboard

### This month

Total water used by your flat since the 1st of the current month, in litres (L). It updates every day as new meter readings arrive.

### Estimated bill

What that usage costs so far this month, using the rates set by your society. It grows through the month and is final only at month end.

**1,000 litres = 1 kilolitre (kL)**, which is the unit water rates are usually quoted in.

## 5. Daily consumption chart

One bar per day, so you can spot which days you used more water.

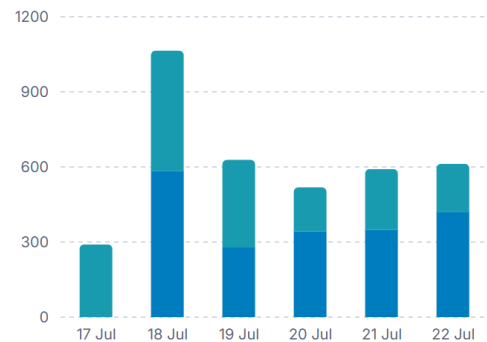

- **Dark blue** — kitchen meter
- **Teal** — bathroom meter

The two colours are stacked, so the full height of a bar is your total for that day.

Tap or hover over a bar to see the exact litres.

A day that is much taller than the rest usually means guests, tank filling, or a tap left running.

Daily consumption

Daily consumption

## 6. Your bill breakdown

This shows exactly how your bill was calculated.

- Each line is a **slab** — a band of usage charged at its own rate per 1,000 litres.
- **Fixed charge** is a flat monthly amount, the same for every flat.
- **Total so far** is the sum of the lines above.

If your society charges more per litre above a certain usage, you will see a second slab line appear once you cross it.

|                    |         |
|--------------------|---------|
| Bill · July 2026   |         |
| 0–3,703 L @ ₹25/kL | ₹92.58  |
| Fixed charge       | ₹50.00  |
| <hr/>              |         |
| Total so far       | ₹142.57 |

Bill breakdown

## 7. History — hour by hour

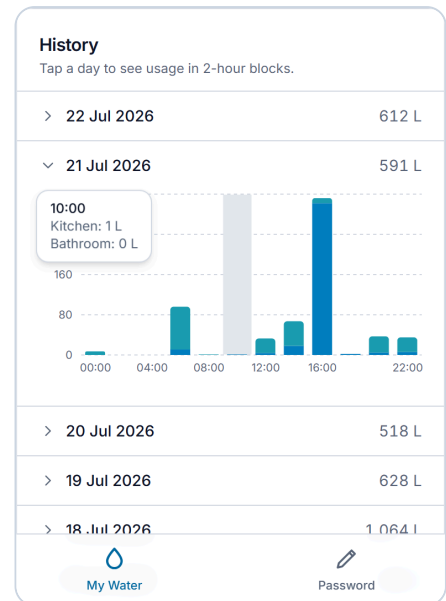

History lists each day with the total litres used.

**Tap any day** to open it. You then see that day split into **2-hour blocks**, from 00:00 (midnight) to 22:00.

This tells you *when* the water was used — morning baths, evening cooking, and so on.

**Worth checking:** if you see steady water use between midnight and 5 a.m. when nobody is awake, you may have a leaking tap or flush. Report it to the office.

Tap the day again to close it.

History with one day opened

## 8. Your meters

Your flat normally has two meters — **kitchen** and **bathroom**.

For each one you can see:

- The date of the **latest reading** received.
- The **totalizer** — the lifetime running total on that meter, exactly like a car odometer. It only ever goes up.

Your monthly usage is the difference between totalizer readings, so a large totalizer number is completely normal.

| Your meters                                                                       |                                       |                             |
|-----------------------------------------------------------------------------------|---------------------------------------|-----------------------------|
|  | <b>Bathroom</b><br>Latest 22 Jul 2026 | <b>8,278 L</b><br>totalizer |
|  | <b>Kitchen</b><br>Latest 22 Jul 2026  | <b>9,548 L</b><br>totalizer |

## 9. Setting a password (optional)

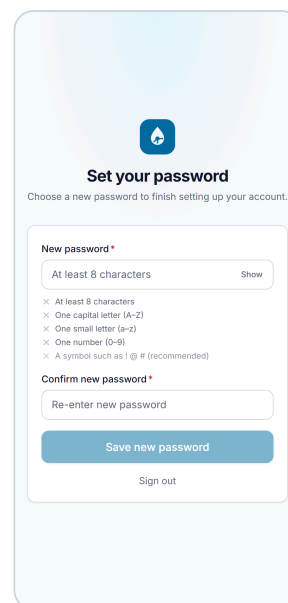

You never need a password — the email code works every time. But if you would like to sign in with a password as well, you can set one.

Tap **Password** in the bottom menu, then:

1. Type a password with **at least 8 characters**, including a **capital letter**, a **small letter** and a **number**.
2. Type it again to confirm, and tap **Save**.

Afterwards you can sign in using either method — **Password** or **Email code**. To sign out, use the exit icon in the top-right corner.

**Avoid** your flat number, your username, and easy runs like *1234* or *abcd* — these are not accepted.

The screenshot shows a mobile app interface for setting a password. At the top is a blue header with a house icon and the text 'Set your password'. Below this is a subtitle 'Choose a new password to finish setting up your account.' The main form area has a 'New password' section with a text input field containing 'At least 8 characters' and a 'Show' button. Below the input field are four error messages, each preceded by a red 'x' icon: 'At least 8 characters', 'One capital letter (A-Z)', 'One small letter (a-z)', and 'One number (0-9)'. There is also a note 'A symbol such as ! @ # (recommended)'. Below the 'New password' section is a 'Confirm new password' section with a text input field containing 'Re-enter new password'. At the bottom of the form are two buttons: 'Save new password' (in blue) and 'Sign out' (in grey).

Setting a password (optional)

## Common questions

### Do I need a password?

No. Just choose **Email code** each time and sign in with the code we email you. A password is optional.

### I didn't get the code email.

Check your spam/junk folder. After a minute, tap **Resend code**. If it still doesn't arrive, contact the society office to confirm the email on file for your flat.

### My dashboard says no readings yet.

Your meters have not sent data so far. This is normal just after installation — please check again in a day or two.

### My usage looks far too high.

Open History and look at the 2-hour blocks. Continuous use overnight almost always means a leak. Report it to the office.

### Can I see other flats?

No. You only ever see your own flat's meters and bill.

### Is the estimated bill the final amount?

No. It grows during the month and is confirmed by the society at month end.

For any help with the portal, contact your society office.
