

QubecSense

Water Meter Portal — Resident Guide

What this guide covers

- Signing in for the first time
- Setting your own password
- Reading your water dashboard
- Checking your bill and daily history
- Changing your password later

Regency Anantam · Rosalyn-21

Your flat number and usage will appear in place of the samples shown here.

1. Signing in for the first time

Open the portal link given by your society office in any browser on your phone or computer.

Your username

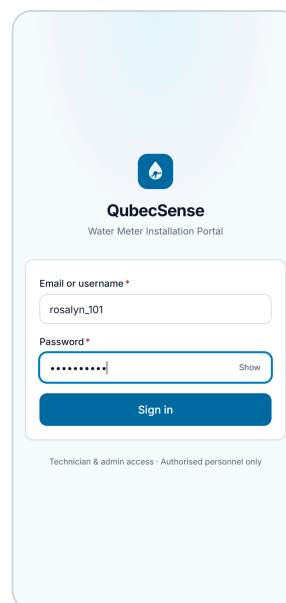

Your username is the word **rosalyn**, an underscore, and your flat number:

Flat	Username
101	rosalyn_101
1203	rosalyn_1203

Your password

Use the one-time password given to you by the society office. Type it exactly — it is case sensitive.

Tip: tap *Show* next to the password box to check what you typed.

The image shows a mobile app sign-in screen for 'QubecSense Water Meter Installation Portal'. At the top is a blue water drop icon. Below it, the text 'QubecSense' and 'Water Meter Installation Portal' are displayed. The main form has two input fields: 'Email or username *' with the text 'rosalyn_101' and 'Password *' with masked characters '.....'. A 'Show' link is next to the password field. A blue 'Sign in' button is at the bottom of the form. Below the button, small text reads 'Technician & admin access - Authorised personnel only'.

The sign-in screen

2. Creating your own password

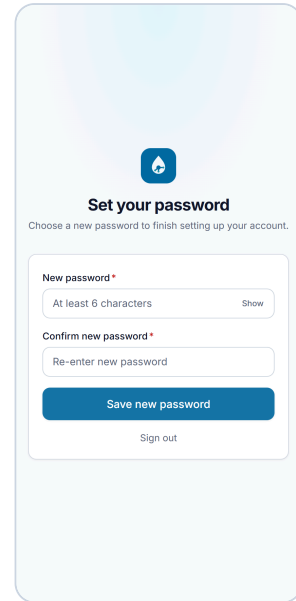

The first time you sign in, you must replace the one-time password with your own. This screen appears automatically.

1. Type a new password — at least **6 characters**.
2. Type the same password again to confirm.
3. Tap **Save new password**.

You go straight to your dashboard. From then on, sign in with your *new* password.

Please note: the one-time password stops working once you set your own. Choose something you will remember.

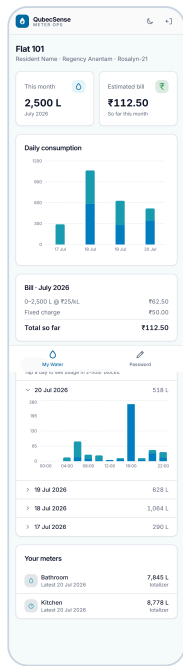

Nobody at the society can see your password — if you forget it, the office issues a fresh one-time password.

Setting your own password

3. Your dashboard at a glance

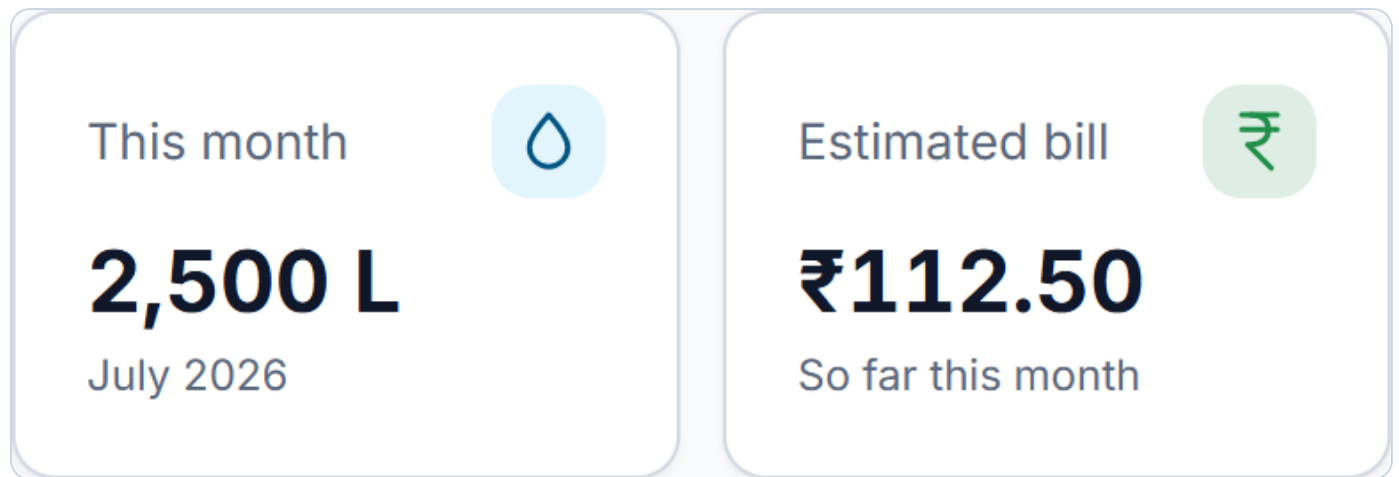

After signing in you land on **My Water** — everything about your flat's water use, in one screen.

The complete resident dashboard

The sections are explained one by one on the following pages.

4. This month and your bill

Summary cards at the top of the dashboard

This month

Total water used by your flat since the 1st of the current month, in litres (L). It updates every day as new meter readings arrive.

Estimated bill

What that usage costs so far this month, using the rates set by your society. It grows through the month and is final only at month end.

1,000 litres = 1 kilolitre (kL), which is the unit water rates are usually quoted in.

5. Daily consumption chart

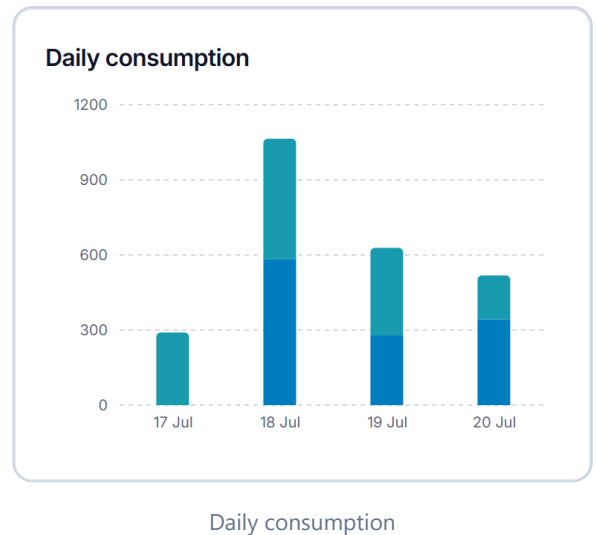

One bar per day, so you can spot which days you used more water.

- **Dark blue** — kitchen meter
- **Teal** — bathroom meter

The two colours are stacked, so the full height of a bar is your total for that day.

Tap or hover over a bar to see the exact litres.

A day that is much taller than the rest usually means guests, tank filling, or a tap left running.

6. Your bill breakdown

This shows exactly how your bill was calculated.

- Each line is a **slab** — a band of usage charged at its own rate per 1,000 litres.
- **Fixed charge** is a flat monthly amount, the same for every flat.
- **Total so far** is the sum of the lines above.

If your society charges more per litre above a certain usage, you will see a second slab line appear once you cross it.

Bill · July 2026	
0–2,500 L @ ₹25/kL	₹62.50
Fixed charge	₹50.00
Total so far	₹112.50

Bill breakdown

7. History — hour by hour

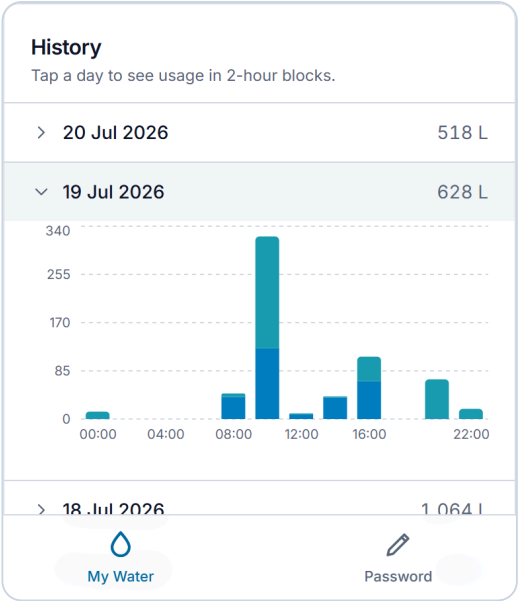

History lists each day with the total litres used.

Tap any day to open it. You then see that day split into **2-hour blocks**, from 00:00 (midnight) to 22:00.

This tells you *when* the water was used — morning baths, evening cooking, and so on.

Worth checking: if you see steady water use between midnight and 5 a.m. when nobody is awake, you may have a leaking tap or flush. Report it to the office.

Tap the day again to close it.

History with one day opened

8. Your meters

Your flat normally has two meters — **kitchen** and **bathroom**.

For each one you can see:

- The date of the **latest reading** received.
- The **totalizer** — the lifetime running total on that meter, exactly like a car odometer. It only ever goes up.

Your monthly usage is the difference between totalizer readings, so a large totalizer number is completely normal.

Your meters		
	Bathroom Latest 20 Jul 2026	7,845 L totalizer
	Kitchen Latest 20 Jul 2026	8,778 L totalizer

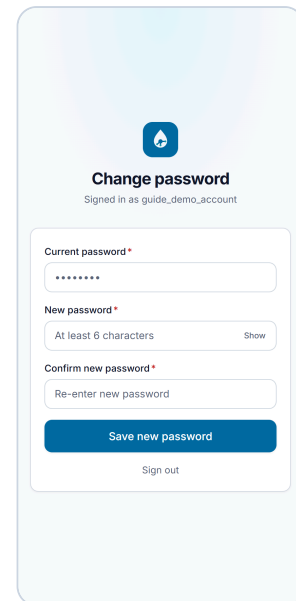

Your meters

9. Changing your password later

Tap **Password** in the bottom menu at any time.

1. Enter your current password.
2. Enter the new password twice.
3. Tap **Save new password**.

To sign out, use the exit icon in the top-right corner of the screen.

Changing your password

Common questions

I forgot my password.

Contact the society office. They will issue a new one-time password, and you set your own again on the next sign-in.

My dashboard says no readings yet.

Your meters have not sent data so far. This is normal just after installation — please check again in a day or two.

My usage looks far too high.

Open History and look at the 2-hour blocks. Continuous use overnight almost always means a leak. Report it to the office.

Can I see other flats?

No. You only ever see your own flat's meters and bill.

Is the estimated bill the final amount?

No. It grows during the month and is confirmed by the society at month end.

For any help with the portal, contact your society office.
